Professional Summary

Backend-focused Full-Stack Engineer with experience building and modernizing enterprise-scale financial applications. Experienced in migrating monolithic architectures to Spring Boot microservices, designing high-throughput REST APIs, and developing scalable front-end applications using React.js. Proven ability to support production systems, improve deployment efficiency, troubleshoot technical issues, and deliver reliable software in Agile environments.

Technical Skills

Primary Skills: Java, Spring Boot, React.js, REST APIs
Frontend: React.js, HTML5, CSS3, Material UI, React Native
Backend: Node.js, Express.js, Hibernate
Databases: MySQL, PostgreSQL, MongoDB
Data Engineering & BI Tools: Tableau, Informatica PowerCenter
Cloud & DevOps: AWS (EC2, S3), Docker, Git, CI/CD Pipelines
Mainframe: TSO/ISPF, CICS Transactions, IMS DB

Professional Experience

Tata Consultancy Services (TCS) Feb 2025 – Present
Assistant System Engineer – Financial Services Domain *Hyderabad, Telangana*

- Modernized legacy financial applications by decomposing monolithic components into Spring Boot microservices and integrating automated CI/CD pipelines, reducing deployment cycles by 40%.
- Designed and developed secure RESTful APIs supporting more than 10,000 daily transactions, with a focus on performance, security, backward compatibility, and production reliability.
- Implemented React.js user-interface enhancements, including trap mechanisms and dynamic routing based on link type and application workflow.
- Validated and troubleshot mainframe applications through TSO/ISPF sessions and CICS transaction workflows.
- Implemented EZT functionality to enable efficient and accurate searching in the production environment, improving operational usability.
- Collaborated with QA, DevOps, and product teams during Agile sprints, contributing to more than three successful production releases.

Projects

SIA ALL IN ONE | *React Native, Firebase* | Project Link Jun 2024 – Jul 2024

- Designed and developed a user-friendly React Native mobile application that provides users with access to academic and reference materials.
- Implemented Firebase for real-time database management and secure user authentication, supporting reliable application performance.

Resort Application | *React.js, MySQL* | Project Link Jan 2024 – Feb 2024

- Built a responsive resort booking application using React.js and MySQL, enabling users to browse resort rooms and make reservations.
- Developed an admin dashboard to manage reservations, monitor room availability, and review booking metrics.

Education

Gayatri Vidya Parishad College of Engineering (Autonomous) Feb 2021 – Apr 2024
Bachelor of Technology in Computer Science and Engineering | CGPA: 8.65 *Visakhapatnam, Andhra Pradesh*

Achievements & Leadership

- Received the Pratibha Award for excellent performance in the 10th board examinations.
- Secured first place as part of a two-member team in a UI/UX design contest conducted during the college cultural fest and annual day.
- Served as Vice President of the National Service Scheme (NSS) Club.
